AngularJs　　●●●●●

Angular 2 - 6　　●●●○○

**SQL / No SQL
(PostgreSQL &
Mongo DB)**　　●●●●○

AWS - **Serverless**,
Step Functions,
Lambda, SQS, SNS,
Api Gateway, etc　　●●●●○

Dev Tools - Git, **Git
Flow**, Linux (Arch &
Ubuntu), **Linting**,
Sonar, **Unit Test
Frameworks**, etc　　●●●●●

EMPLOYMENT HISTORY

WEBAPPS - ENGINEER

Sourcefuse Technologies, Mohali　　Nov 2017 - Present

- Working in HealthCare Project using **NodeJs**, **Serverless stack**, **AWS**, **AngularJs**
- Apart from above tech stacks, we are using Pubnub, Google APIs, Lyft APIs, Twillio, etc.
- Leading sometimes team of 2-3 developers to design solutions and review planning and work done.

FULL STACK JAVASCRIPT DEVELOPER

InstaRem PTE Ltd, Mumbai　　July 2017 - Nov 2017

- **InstaRem** is a **fintech product company** involved in Foreign Exchange. It is using technology to innovate the way people use to send money oversees.
- Worked in **NodeJs**, **Feathers**, **Loopback**, **Microservices**, **ReactJs** & **Redux**.

SYSTEM ENGINEER

Tata Consultancy Services, Mumbai　　Oct 2016 - July 2017

- Because of good programming skills, got transferred from QA role to Full Stack Web Developer and later I started working in Javascript.
- Worked as part of **CodeVita Project** (Coding Contest Platform by TCS) for complete year.
- Web Designing using **html5**, **css3**, **javascript**, **jquery**, **chart.js**, and **bootstrap**.
- Worked in one innovation project (Gamifying detection of Plagiarism in Contest) using **Nodejs**, **Express**, **React** and **Redux**.
- Handling Server using **Amazon AWS**, **HA Proxy**, **Centos**, **Mooshak, SCP**.
- Creating Web Services using Eclipse, **Java Servlets and JSP.**

ASSISTANT SYSTEM ENGINEER

Tata Consultancy Services, Hyderabad　　Oct 2015 - Oct 2016

- Completed training in **Java EE** and **Automation Testing tools** and started with Automation QA Role.
- After completion of training, I got selected for **Learning Enabler Role** where I was assigned the task of **teaching new trainees** in relevant fields.
- Created C# tools (Lead myself) for client that help in automation of functional testing which was going on manually at project's onshore.

LEARNING MORE ABOUT

Typescript

Trying to use typescript everywhere in addition to Angular. It makes me feel like I am using Java again (Types, Annotations, Generics, Interfaces, etc)

Data Structures

This is the thing I have always missed while I was more focused on technologies. Now learning again how to make use of Stack, Queues, Hash Maps and Graphs properly.

CSS Animations | SVG | Layouts

UI remains my core skill always, so pushing myself to master it now. Learning more about Flex and Grid Layouts, Animations (Frames) and how to work with or animate SVGs.

Backend Architectures and Patterns

Learning NodeJs, Java or any language is not enough.
Now learning more about Microservice Architectures, Queuing Systems, etc.

- Got appreciation for above task and saved more than $ 6000 of client by automating most of things.
- Worked in Innovation Lab to develop new creative application that will help in company's internal working and process flow. Developed 3 Java web applications that are deployed in production Successfully.

ACADEMIC BACKGROUND

B.Tech in Computer Science and Engineering
GNDU, Regional Campus, Gurdaspur

06/2011 - 05/2015   74.6 % (8.6 CGPA)

10+2 (CBSE)
SGHI School, Amritsar

04/2009 - 03/2011   89.2 %

Metric (ICSE)
All Saints Convent School, Ajnala

04/2008 - 03/2009   88%
